

Changes made:

- placed long logo as the background of the footer
- extended the sky to be taller (maybe we could just change the logo to have a taller sky)
- place the social media buttons on the top left on top of the sky
- place the Washington and lee logo in the center of the logo +extended sky
- place to [clmp] thing on the far right

Coding it:

```
<footer id="colophon" class="site-footer container"> ==$0
                        ::before
                         <hr>
            <div class = "site-info row">
                        <div class = "col-md-12">
                                    <a href = "http://shenandoahliterary.org/682/" class="img-fluid-link"
                                    Rel="home" intemprop="url"
                                     img width="1600 height="456" src="https://shenandoahliterary.org/681/files/2018/12/Shenandoah-1600.jpg" class="img-fluid"
alt="Shenandoah Volume 68, Number 1" itemprop="logo" srcset="https://shenandoahliterary.org/681/files/2018/12/Shenandoah-1600.jpg 1600w,
